

AS092

Leader in Biomolecular Solutions for Life Science

HRP-conjugated Rabbit anti-Human IgG1 (Fc) mAb

Catalog No.: AS092

Basic Information

Observed MW

50 kDa

Calculated MW

Category

Secondary Antibody

Applications

WB, ELISA

Cross-Reactivity

Human

CloneNo number

ARC53385-HRP

Conjugate

HRP

Recommended Dilutions

WB 1:2000 - 1:30000

ELISA 1:5000-1:10000

Background

Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies. Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.

Immunogen Information

Gene ID

Swiss Prot

Immunogen

This information is considered to be commercially sensitive. The antibody may cross-react with immunoglobulins from other species.

Synonyms

Product Information

Source

Rabbit

Isotype

Horseradish peroxidase
conjugated IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol and 0.2% BSA, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3

Validation Data

Western blot analysis of vlysates from Human plasma using HRP-conjugated Rabbit anti-Human IgG1 (Fc) mAb (AS092) at 1:4000-1:32000 dilution.
Lysates/proteins: 25 µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
Detection: ECL Basic Kit (RM00020).
Exposure time: 30 s.
