# Cryopreservation Performance

Bone marrow mesenchymal stem cells (BM-MSCs) from three different species were cryopreserved using Pricella® **Primary Cell Cryopreservation Solution (SFC1)** (Cat. No.: PB180439). After one month of storage at -80°C, post-thaw cell viability remained above 90% in all cases, with significantly higher cell activity and proliferation capacity compared to other commercial cryopreservation solutions.
